STEELBUILD
INFRA PROJECTS LTD

ABOUT US

Steelbuild Infra Projects Limited is a rapidly growing and professionally managed company specializing in the Design, Fabrication and Execution of Pre - Engineered Steel Buildings and High -quality industrial steel structures. Since our inception in 2020, we have remained committed to delivering engineering excellence, superior quality and customer satisfaction.

Our journey reflects a strong focus on growth and capacity enhancement. We commenced operations in 2020 with a manufacturing capacity of 12000MT per annum in Distt. Sonipat, Haryana. Addition to that in 2022 we expanded our production capabilities by adding an additional production capacity of 1,000 MT per month. Continuing to our commitment to excellence and innovation, Steelbuild scaled up the production and established a major manufacturing facility in 2025 with a capacity of 2,000 MT per month in Vill. Katwal , Gohana. Today, Steelbuild Infra Projects boasts a total installed production capacity of 50000MT per annum, enabling us to undertake large-scale projects with efficiency and reliability.

Our strength lies in our integrated approach to project delivery, a dedicated in-house design team ensures optimized engineering solutions tailored to client requirements.

Equipped with advanced and modern machinery, our manufacturing facilities deliver precision-engineered products with consistent quality standards and timely execution.

Complementing to our manufacturing capabilities, we have highly experienced project management team that oversees every stage of project execution ensuring seamless coordination, adherence to timelines, and successful project delivery.

At Steelbuild Infra Projects, we also take pride in our customer-centric culture. Our dedicated sales and customer relationship management team works closely with clients to understand their needs, provide responsive support, and deliver a delightful customer experience that builds long-term trust and confidence.

Driven by Commitment, Quality, Innovation, Integrity and Excellence, Steelbuild Infra Projects continues to strengthen its position as a trusted partner for steel structure and infrastructure solutions across India.

VISION

Our vision is to be the most admired & trusted organization that offers excellence in all aspects of steel structure products and services.

MISSION

Our mission is to work with supremacy to stand out from the crowd by satisfying the customer's requirements by providing quality services.

VALUES

- Trustworthy & Solidarity
- Empowering the Innovation
- Customer Satisfaction

OUR MILESTONES

2026

(Powering the Next Chapter on the System and Operational Excellence) Achieved a turnover of ₹340 Crore and proudly transformed into Steelbuild Infra Projects Limited, marking a new chapter of growth and corporate excellence.

2025

(A New Era of Manufacturing Excellence) Commissioned a state of the art manufacturing facility at Vill. Katwal, Gohana which added 2000MT/month production capacity. Total installed production capacity 50000MT/annum. Crossed the milestone of ₹202 Cr turnover.

2024

(Engineering Excellence at Scale) Delivered several high value projects and achieved turnover of ₹157 Cr.

2023

(Scaling New Heights) Executed landmark industrial projects and achieved significant revenue growth of ₹86 Cr. turnover with operational efficiency.

2022

(Expanding Horizons) Added second manufacturing unit and enhanced production capacity by 1000MT/month.

2021

(Building Trust, Delivering Excellence) Established a reputation for Quality, Safety and Timely delivery.

2020

(The Foundation of Strength) Began the journey with vision to redefine steel construction excellence. First manufacturing facility of 12000MT/annum commission at Distt. Sonipat, Haryana.

Mr. Varun Arora

Mr. Varun Arora is a seasoned professional in the steel structure industry with over 17 years of rich experience spanning business development, project execution, client relationship management, and strategic growth. **Holding an MBA in Sales & International Business**, he has played a pivotal role in establishing Steelbuild Infra Projects as a trusted name in the field of Pre-Engineered Buildings, structural steel fabrication, and turnkey industrial infrastructure solutions.

Since entering the industry in 2009, Mr. Arora has successfully led numerous projects across diverse sectors, earning a reputation for delivering quality, reliability, and customer satisfaction. His strong business acumen, customer-centric approach, and commitment to operational excellence have been instrumental in driving the company's sustained growth and market presence.

Under his leadership, Steelbuild Infra Projects continues to expand its capabilities, embrace innovation, and create long-term value for clients, employees, and stakeholders. His vision is to build one of India's most admired and trusted steel structure companies, known for engineering excellence, integrity, and superior service.

Mr. Sandeep Mendiratta

Mr. Sandeep Mendiratta is an experienced industry professional with over 20 years of experience in the Pre-Engineered Building (PEB) and steel construction sector. **B.Tech in Industrial Production Engineering**, he began his professional journey in 2006 and has since worked with several leading organizations in the industry, developing extensive expertise in operations management, manufacturing, supply chain optimization, business development, and organizational growth.

Throughout his career, he has played a key role in establishing efficient production systems, strengthening operational processes, and driving business expansion. His strong technical foundation, combined with practical industry experience, has enabled him to enhance manufacturing efficiency, build high-performing teams, and deliver sustainable business growth.

As the **Co-Founder and Director of Steelbuild Infra Projects**, Mr. Mendiratta leads the company's strategic vision and growth initiatives. His focus on operational excellence, innovation, quality, and customer satisfaction has been instrumental in building Steelbuild Infra into a trusted name in the PEB and steel construction industry. Under his leadership, the company continues to deliver reliable, value-driven infrastructure solutions while creating long-term value for customers, employees, and stakeholders.

WHAT IS PRE ENGINEERED BUILDING ?

DESIGN CENTRE

At Steelbuild Infra, every building is meticulously designed to meet the highest National and International Engineering Standards, including IS, AISC, AISI, MBMA, and AWS codes. Our Expert Design and Engineering Team utilizes industry-leading software such as STAAD. Pro, Tekla Structures, and AutoCAD, complemented by customized connection and bracing design solutions. The result is innovative, reliable, and cost-effective building systems that deliver exceptional performance, quality, and value.

PRE ENGINEERED STEEL BUILDING

Steelbuild Pre-Engineered Buildings can be 100% customised designed to provide maximum space utilisation, excellent strength, minimum waste and building use case. Everything we do is keeping in mind the highest safety standard, safety is priorities at all the times.

PRIMARY FRAMING TYPE

TYPICAL PLAN

CRANE BUILDING

ROOF SYSTEM

BUTTERFLY CANOPY (T-CAN)

MULTI SPAN3

LEAN-TO

CURVED RAFTER

L- CANOPY (L-CAN)

SECONDARY MEMBERS

C SECTION

C-Section are normally 200mm deep with a 100 flange. These flanges are perpendicular to the web and have a 24 mm stiffening lip.

PURLINS & GIRTS

Purlins and Girts are roll formed Z Section, 200 mm deep 64 mm flanges shall have a 16mm stiffening lip formed at 45 degree to the flange.

EAVE STRUT

Eave Struts constructed from cold formed 'C' Section and it is rolled to the roof slope. This member transmit longitudinal wind force on the end walls from roof brace rods to wall brace rods.

ROD BRACING

Rod bracing (also called X- bracing) is a tension-only bracing system. Locates in the roof and walls of a building between frame members, transferring longitudinal forces to foundation. Cable bracing (like rod bracing) is a tension-only X-bracing system.

ROOFING & CLADDING SYSTEMS

STEELBUILD ROOFING SHEET

Steelbuild offers strong and cost effective profile and it's developed specifically for roofing applications

STANDING SEAM ROOFING SYSTEM

Steelbuild offers standing seam systems with double lock (360 degree) standing seam, eliminates the risk of leakage at fasteners at side and end laps due to the concealed fastening systems and provide all weather projection.

STEELBUILD CLADDING SHEET

Steelbuild offers strong and cost effective cladding sheet profile and it's developed specifically for concealed fastener panel with a sculptured valley shape between the major ribs for a superior architectural look for external walls.

STEELBUILD DECK SHEET

Steelbuild deck sheet is being used in multi-story buildings like car showrooms, warehouse, offices, industrial. These deck sheets are being used as permanent shuttering to support the concrete and helps in creating composite slabs and floor beams.

ACCESSORIES

TURBOVENTS

RIDGE VENTILATOR

LOUVERS

POLYCARBONATE SHEET

INSULATION

AIR BUBBLE

Reflective air bubble insulation reflects heat and almost 97 percent of radiant heat rays to keep the inner atmosphere at stable temperature. Application of polyethylene bubble insulation can be used in both hot and cold climates.

GLASS WOOL

Glass Wool is an insulating material made from fibers of glass arranged using a binder into a texture similar to wool. The process traps many small pockets of air between the glass, and these small air pockets result in high thermal insulation properties.

ROCK WOOL

Mineral Wool is any fibrous material formed by spinning or drawing molten mineral or rock materials such as slag and ceramics. Applications of mineral wool include thermal insulation, filtration and plays vital role in fire resistance to the building.

SHEETING ACCESSORIES

DOWNTAKE PIPE

Downtake pipes are used to transport the water down, directly from the roof or from the gutters, until the storage tank. The Gutters offers least resistance and result in optimum flow. Their wider mouth reduces wastage of water by splashing.

RIDGE CAP PIPE

Ridge Cap, a material or covering applied over the ridge of a roof, that covers the ridge and overlaps the intersecting field roofing.

GUTTER

A material or covering applied over the ridge of a roof, that covers the ridge and overlaps the intersecting field roofing.

STANDING SEAM DUAL PROFILE ROLL FORMING MACHINE

No		Specification of the Material

PLANT AND MACHINERY

State-of-the-art manufacturing facility with a capacity of 50,000 MT PA and ISO 9001:2015 Accredited.

CNC MULTI-TORCH PLASMA CUTTING SYSTEM - 3 NOS.

Cutting and Machining flame cutting

- A pressurized mixture of oxygen and combustible gas is used in this method like propane heats the steel
- The Heat is focused on a very narrow band and the steel melts at 1500 degree celsius
- The process attains the expected cuts quickly
- Due to a rapid thermal cycle of heating and cooling residual stresses and distortion are included
- The Heat is focused on a very narrow band and the steel melts at 1500 degree celsius
- Capacity: 20MT/day
- Max Pro 200 Hyper Therm

HEAVY DUTY H-BEAM WELDING LINE - 3 NOS.

- Web Height 200-1500mm
- Flange Thickness 5-25mm
- Voltage 415V/50/60HZ, 3Ph
- Flange Width 200-500mm
- Web Thickness 5-20mm
- Work Piece Length 2.5-13mm
- Welding wire diameter 1.6mm
- Web Taper Angle 15°
- Welding Type Single arc twin wire/single wire
- Welding Speed 300-1000mm/min (Step less speed adjustment.)

8-WHEEL AUTOMATIC SHOT BLASTING MACHINE

- Machine Opening Size: 1,500 mm (H) × 1,500 mm (W)
- Effective Working Envelope: 1,400 mm (H) × 1,400 mm (W)
- Conveyor System : Automatic Roller Conveyor comprising:
- 12 m Inlet Roller Conveyor
- 12 m Outlet Roller Conveyor
- Blast Wheels : 8 Nos. high-efficiency blast wheels (11 kW each)

QUICK INTERCHANGE C & Z PUNCHING MACHINE

- With pre leveling, pre punching & pre-cutting device
- Thickness 1.5mm-3.5mm for 345 mpa & U.S.T 550 mpa Z100-Z 350, C100-C350
- 25 m/min speed
- 5MT Automatic Decoiler
- Pre-Programmable with +2mm to corners

HV SERIES ROLL FORMING MACHINE

- Raw material: pre-painted galvalume steel Sheet
ASTMA 526/JIS G3302 SGCC
or other same class of soft material
- Coil thickness: 0.3mm- 0.8mm for 550 mpa, Effective width: 1225mm.
- Line speed: max. 20m/min.
- Uncoiler Load capacity: 6MT

DUTY 3 M PRESS BREAK HEAVY

- Capacity**
- 1500 KN.
 - Max Working length-3150mm.
 - Distance between frames- 3000mm
- Sharing**
- Sections can be cut to length or width by cropping or shearing using hydraulic shears. Heavy sections or long plates specialist plate shears.
 - For smaller plates sections-shearing knives.

AUTOMATIC DOWN TAKE PIPE ROLL FORMING MACHINE

- Automatic Roll Forming Machine for manufacturing S-Type Down Take Pipes / Downspouts from pre-painted galvanized (PPGI) or galvanized steel coils.
- Type: S-Type Down Take Pipe
- Size: 137 mm × 174 mm

High-capacity, precision-engineered equipment supporting world-class manufacturing standards.

INDUSTRIES WE SERVE

At Steelbuild Infra, we deliver customized infrastructure solutions across a wide range of industries. Our expertise, experience and execution capabilities allow us to cater to diverse sector requirements with precision and quality.

**Food
Processing
& FMCG**

**Warehousing
& Logistics**

**Industrial
Manufacturing
Units**

**Pharmaceuticals
& Healthcare**

**Agriculture
& Cold Storage**

Projects**

We understand that every industry has unique needs, and we focus on providing solutions that are efficient, durable, and aligned with industry standards.

CUSTOMIZED PRODUCTS

We also offer our clients customized products according to their business requirements. These custom products are designed & manufactured as per the demand of the customers for which we keep the industry-standards in the mind to make them aesthetic & competitive at the same time. The weather resistant & anti corrosion features make our products competitive in the market.

STEELBUILD INFRA PROJECTS SUPREMACY

- Economical
- Expansion flexibility
- Easy to install
- Manufacturing Quality-Control
- Environment-Friendly
- Weather Resistant roof & wall coverings
- Translucent
- Long-term Durability

HSE POLICY

At Steelbuild Infra Projects, Health, Safety, and Environmental responsibility are integral to every aspect of our operations. We are committed to providing a safe and healthy workplace for our employees, contractors, visitors, and all stakeholders while ensuring that our activities are carried out with respect for the environment.

We believe that every incident is preventable through proper planning, awareness, and accountability. Our objective is to maintain the highest standards of workplace safety, minimize environmental impact, and promote a culture where everyone actively participates in creating a safe working environment.

To achieve these commitments, we:

- Conduct regular safety training and awareness programs to ensure employees understand and follow safe work practices.
- Provide appropriate Personal Protective Equipment (PPE) and enforce its mandatory use across all project sites, fabrication facilities and workplaces.
- Establish and maintain safe operating procedures for equipment, machinery and work processes.
- Identify workplace hazards proactively and implement effective control measures to reduce risks.
- Encourage employees to report unsafe conditions, near misses and safety concerns without hesitation.
- Maintain emergency response and preparedness plans to effectively manage unforeseen situations.
- Promote employee health and well-being through periodic health check-ups, awareness initiatives and welfare programs.
- Comply with all applicable legal, regulatory and industry requirements related to health, safety and environmental management.
- Strive to reduce waste, conserve resources, and continuously improve environmental performance across our operations.
- Regularly review and improve our HSE practices to ensure continual enhancement of workplace safety and sustainability.

At Steelbuild Infra Projects, safety is not just a policy—it is a shared responsibility and a core value that guides our decisions and actions every day.

OUR CERTIFICATES

Awarded as Emerging Company in Pre-Engineered Building Solutions by Outlook Business Spotlight

Awarded as India's Iconic Sustainable Leaders By Brand Vista

CULTURE & CELEBRATIONS

EXHIBITION

GREEN

Is More Than A Goal — It's The Foundation
of Every Structure We Build.

OUR COMMITMENT

Every project delivered by Steelbuild Infra Projects reflects our commitment to quality, efficiency, and environmental stewardship. By combining innovation, engineering expertise, and responsible practices, we create infrastructure solutions that support business growth while respecting the needs of future generations.

ENGINEERING INFRASTRUCTURE WITH TOMORROW IN MIND

At Steelbuild Infra Projects, sustainability is integrated into the way we design, manufacture, and execute every project. We believe modern infrastructure should not only meet today's operational needs but also contribute to a more efficient and responsible future.

SMART RESOURCE UTILIZATION

Through precision engineering and optimized fabrication processes, we maximize material efficiency and minimize unnecessary waste across our operations.

ENERGY - EFFICIENT SOLUTIONS

Our building systems are designed to support improved thermal performance, reduced energy consumption, and long-term operational efficiency for clients.

FASTER EXECUTION, LOWER IMPACT

Off-site manufacturing and streamlined construction methodologies help reduce site disturbance, improve project timelines, and create a safer cleaner work environment.

ENVIRONMENTAL RESPONSIBILITY

We continuously evaluate our processes to reduce environmental impact, promote responsible resource usage, and support sustainable development goals.

Creating Stronger Structures.
Building A Better Future.
